IMPORTANT NOTES

Upgrading

- You can only upgrade to this release from Pilot 20150915 SQL3-P2 and later versions
- PilotLive should NOT be running during the upgrade

Required Programs

- Print Server PPSrve.exe v4.8.12
 - Now uses validate.dll to open a connection to the SQL database
 - Added logic to connect to fiscal printers after restart
 - This caters for receipt completion in the event of a device error
 - Negative entries will be trapped and not printed
 - Changed interface to allow for orders and loyalty slips, but these will visually not be tax invoices, and cannot be used as such
 - Label printing updated to include the date on shelf and item labels
 - Delivery labels no longer print a Pilot logo
 - Special characters trapped (< and >)
- Datatools v3.07
 - DisplayTable button retrieval speed improved
 - Registered Products will list all contracts
 - Rebuild maxiday/maxihist function to use latest table structures
- SystemUpdate v3.0
 - Corrects day-end crash with 'field recid cannot be updated'
- Pilot API v3.24-4
 - Added auto SQL Db lockdown as an automated task, scheduled to run at 05h00

PILOT ADMIN

Admin – Bug Fixes

- Discount Report | not printing on 1st of a month | corrected
- Average Spend per Meal Report
 - Removed Main Meal submenu | replaced with Main Meal Comparatives
 - Rewritten to show data in a grid
 - Added average column
- PLU Sales Information | stored with old trading date | corrected
- Banking Report | headings misaligned | corrected
- Suppliers | double [ENTER] error | corrected
- Purchase Payments report | bug allows trigger of multiple reports | corrected
- Loyalty and gifting report wrongly included bill discount entries | corrected
- Cannot save loyalty and giftcard report to PDF | corrected
- PLU time sales analysis report
 - Rewritten to show data in a grid
 - Invalid column error | corrected
 - PLU list not sorted by PLU number | corrected
- PLU item cost report | GP% showing as zero | corrected
- Target / Actual report | shows a blank page | corrected

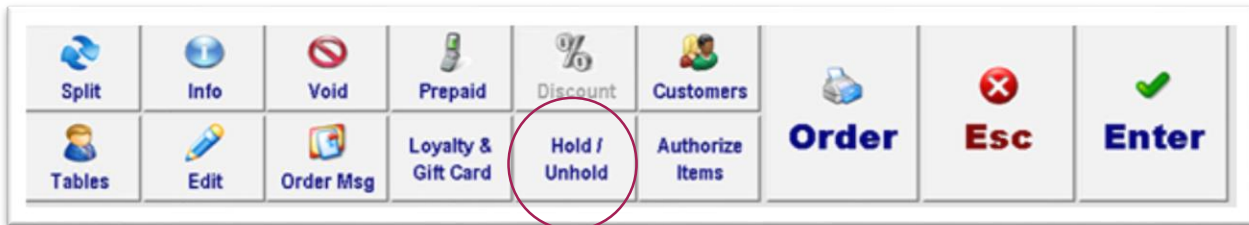

PILOT ADMIN

Admin – Bug Fixes

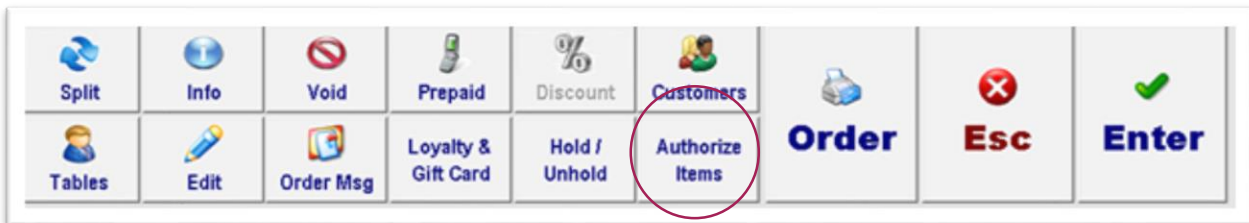

- Loyalty report crashing | corrected
- Day-end | Print Spooler timeout | corrected
- System Log View timeout error | corrected
- Main Meal Comparatives report
 - sort by waiter number or name | corrected
 - scrollbar not working | corrected
- Negative Void not reflecting on cashup | corrected
- Cannot void an item with an order message or modifier | corrected
- Batch purchases | date reverts per supplier | corrected to maintain first selected date as standard
- Stock count sheet grouping issue | corrected
- Income Statement | for locked down sites, the D/E code column, name and cost centre fields were editable | corrected with a /CNTX switch
- Turnover Listing | total for main meal count added
- When /ShowOrdMsg setting is missing or inactive, modifiers are not shown | corrected so that modifiers are always shown
- Department Sales report gives floating point error | corrected

PILOT POS

PoS Enhancements

- Hold / Unhold
 - When attempting to order with items on hold, the On Hold screen will immediately be shown
 - Previously, a warning message was displayed

- Authorize Items
 - Authorize All function added
 - Price entry has been removed from the authorization screen
 - Price will be requested for all Open Food items under management authorization
 - When attempting to bill off with items requiring authorization, the Authorize Items screen will immediately be shown
 - Previously, a warning message was displayed
- Fiscal Printing
 - Proforma invoices can be printed to a non-fiscal printer
 - New option in Report | Setup to select the Proforma printer
 - On closing a bill, the bill will print to the fiscal printer
 - Copies and Proforma will print to the selected non-fiscal printer
 - Datecs print driver FP700 is included and copied to \Pilot Disks
 - FPAX_TZA700 COM Server_SETUP_2014_04_03v1_0_0_0.exe

PILOT POS

PoS Enhancements

- Delivery Labels
 - Delivery labels will only print if a label printer is installed and elected in PoS station setup
 - The label printer should not be the default windows printer, otherwise day-end and other reports will print here
 - Zebra print driver v5.1 is included and copied to \Pilot Disks
 - Zebra-zd51075682-certified.exe

PILOT POS

PoS – Bug Fixes

- Loyalty transaction on split bills causes intermittent data loss | transactions wrapped
- Reprint of last bill prints the last bill open, and not the last bill closed | corrected
- Table edit with order messages sets quantity to zero | corrected
- Order messages intermittently display against the wrong main item, or between modifiers | corrected
- Retender of customer payments failing | corrected
- Semper part payments not allowed | corrected
- PoS cashup cannot focus on disabled window error | corrected
- Waiter cashup ESC button malfunction | corrected
- Printing Order Times causes intermittent data loss | transactions wrapped
- Item Transfer and Splits causes intermittent data loss | transactions wrapped

PILOT POS

PoS – Bug Fixes

- Print on split tables only printed split 1 | corrected
- Rounding difference prevents bill from closing – typically larger bills| corrected
- Billing does not enforce Covers Required selection | corrected
- Accumulations | bill total was assigned to each card on multiple swipes | corrected
 - An average is assigned to each card on successful accumulation
 - Loyalty accumulation slip will show client details, and all values returned by a vendor (MaxiClub)
- Order Type not printed on invoice slip | corrected
- WiGroup payment type | the full stop and clear buttons did not work on keypad | corrected
- Delivery Label Printing
 - All labels get printed, instead of only newly order items | corrected
 - Modifiers are printed on their own labels | corrected
 - Label count is incorrect | corrected
- Voids would randomly result in a [tblVoid action cannot be performed..] | corrected
- Discounts and voids report shows the authorized manager as SUPER | corrected
- IOU/Loans | the [cashup to] selection was hidden by the onscreen keyboard | corrected
- Invoice Printing | the /SB:N switch caused invoices to print incorrectly | the switch has been removed and all invoices now print in summary (ie same PLU items are summarized)

PRINT SERVER

Bug Fixes Print server 4.8.12

- Characters '<', '>' in an order message cause the print server to hang and give an error 'Access permission denied' or 'Out of memory' | corrected
- All escape / control characters in a print job will be replaced with an underscore '_' character
- Added the baud rate update to the Print console. The default will still be 9600, but that can now be changed
 - This change is ONLY in this print server and not in Pilot SQL station setup
 - Using the station setup will revert any baud rate changes back to 9600
- When a printer is unavailable for any reason, the print jobs for that printer disappears | corrected
- Now use only one database connection for the whole application
- Only create the Datecs fiscal printing and Label printing interfaces when required
- Open cash drawer time-out | corrected

PILOT CUSTOMERS

Bug Fixes

- Pre Invoice List Report does not show debtor details | corrected
- Minimize button not working | corrected
- Customer address not printing | corrected
- Company name not printing on statement | corrected
- Printing a statement for a period with no transactions did not work | corrected
