- Quad Core Processor

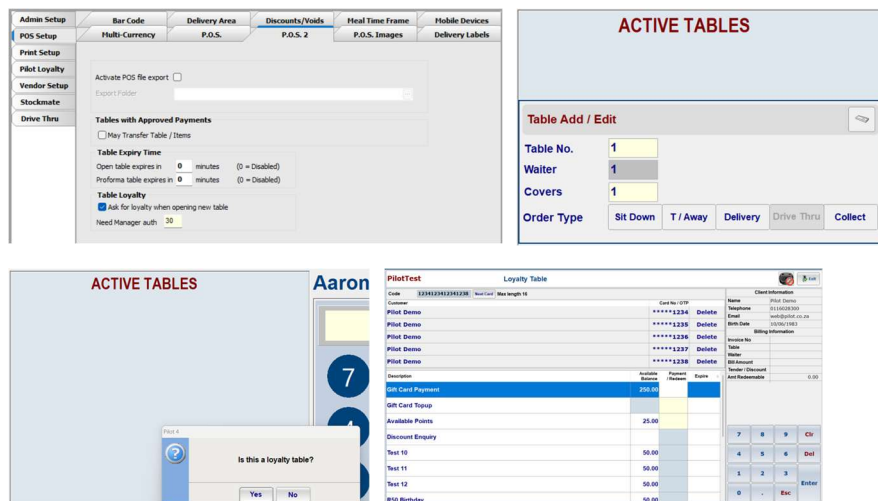

Minimum screen resolution for Pilot Admin is 1360x768.

Sites must have successfully completed a day end prior to upgrading!

New Features

Updated Process Flow for Loyalty

We have added an option to change the process flow of a Loyalty table. When activated the user will be prompted if the table is for Loyalty Customers upon opening the table and link the Loyalty Members

Ability to Disable CREDIT NOTES and DISABLE Negative Items being rung up

We have added the ability to disable Credit Notes and the ability to disable ringing up Negative QTY's on a table.

Database Size issue with Vendorrequests & add to Archiving

We have addressed an issue with the Vendorrequest that is causing the database size to increase. This is caused when a customer keeps the reservations screen open. The Vendorrequest table has been added to Database Archiving as well.

Let's Trade Integration

Let's Trade's POS integration enables seamless interaction between your Point of Sale (POS) system and Let'sTrade offerings. This integration allows your POS system to send codes to Let'sTrade to determine applicable offerings and finalise transactions, facilitating earning rewards, redeeming vouchers, and making payments

New Partner Fiscilization for ZRA

We have added FRH a new third-party fiscalization partner for ZRA to support the latest integration requirements

Fixes and Improvements

Reservations – Added ability to set a TimeOut period

An issue was picked up where we would receive an error when seating a reservation, this was due to a Timeout when communicating with the Vendor.

Pos/Customers A4 Reprint not showing correct Customer Details

An issue was picked up when printing Customer Details on the A4 reprint when an Order Type was not Sit Down, this has been resolved

Discounts & Void issue when a table is Auto Closed

Resolved an issue when a table was Auto Closed resulting in the Discount not writing to the historical tables
